INDEX.

A

Aneurism, Dr. Heming on, 348, 374; caused by constitutional syphilis in the father, 651
Abscess, encysted, of lumbar region, 12; of pelvis, seat, symptoms, and diagnosis of, 213; bursting into the pericardium, 645; in the groin, simulating hernia, 648
Absorption, speedy cure by, 35
Acton's, Mr., case of eczema mistaken for syphilis, 10; constitutional syphilis, 651
Abdominal tumour, case of, 199
"Ad captandum vulgus," 224
Advertisement, an extraordinary, 573
Air, compressed, effects of, 374
Albumen, fat, and starch, digestion of, Dr. R. D. Thomson on, 550
Alcohol in tetanus, 317
Alcoholic drinks, effects of, 186
Allan's, Mr. R., case of hepatic abscess, 645
Allan, Dr., case of popliteal aneurism, 74
Allantoin, Liebig on, 143
Allison, Mr. W., on poisoning by arsenic, 413
Allnatt, Dr. R. H., on neuralgia, 304; on tic douloureux, 451; on the effects of ox gall, 635
Alloxan, Liebig on, 143
Amaurosis and cataract, 252
Ameline, Liebig on, 81
Amenorrhœa, electro-magnetism in, 91
American quack, an, 526
American "doctor's shop," 442
Amputation, of upper extremities, Mr. Liston on, 3; of the thumb, the hand, forearm, elbow, upper arm, shoulder-joint, 57; partial, of foot, 572; of hip-joint, Mr. W. S. Cox on, 193
Anastatic printing, 500
Anæmia occasioning death, 642
Andral and Gavarret on blood, 84
Aneurism of arteria innominata, post-mortem appearance of, 49; popliteal, cured by pressure, 74, 92; cured by injections of tannin, 155; of the bone, 407; treatment of, by compression, 442; dissecting of aorta, 700
Aneurismal tumours, M. Gendrin on, 548
Animal heat, Liebig on, 202
Animation, case of suspended, 733
Aphonia, functional, 506
Apoplexy a cause of sudden death, 637
Apothecaries, Society of, (*see* Government Medical Bill.)
Apothecaries' Hall, gentlemen passed, 25, 54, 80, 141, 187, 225, 279, 306, 368, 402, 429, 457, 484, 512, 546, 601, 629, 666, 694, 722, 746
Arithmetic, interesting question in, 165
Arnica montana, the, 28
Arachnoid, extravasation of blood into, 216
Arm, tumour of, removed, 48
Army and navy surgeons, 249
Arsenic, detection of, in poisoning, 122; in candles, poisoning from, 130; mode of detecting, 282; Dr. Ayres on detection, 367; poisoning by, hydrated peroxide of iron in, 412; detection of, Dr. Venables on, 510; Mr. Woodcock on poisoning by, 640
Arteritis, circumscribed, case of, 709
Ashes of blood and saliva, 92
Assistants, medical, remuneration to, 544
Asthma, iodide of potassium in, 554
Attenborrow, Mr., note from, 197
Autoplasty of the face, 28
Ayres, Dr., contributions to pathology, 8; on detection of arsenic, 367

B

Baillarger, M., on insanity, (*see* Lectures.)
Baker *versus* Lowe, trial of, 216
Baly, Dr. W., on mortality in prisons, 275
Barlow, Mr., on reflex action in paralytic limbs, 409
Barnes, Mr. C. H., note from, 567
Barnes, Mr. R., on amputation of the penis, 266; note from, 624; on variola and scarlatina, 640
Barron, Mr. A., on aneurism of arteria innominata, 49
Barrington, Mr. W. R., note from, 304
Bartley, Mr. R. T., note from, 624
Bateman, Mr., note from, 23
Bath, petition from, on midwifery, 251
Baths and washhouses, 545
Beaumont, Mr. W. R., on a new operation for artificial pupil, 647
Bebeerine, antiperiodic properties of, 500; constitution of, Mr. T. G. Tilley on, 537
Beck, Dr., on the office of coroner, 53
Bedfordshire, meeting in, 363
Bedingfield, Dr., on the Medical Bill, 77; note from, 626
Belaney, Dr. Glover's remarks on his case, 595
Belgrave Lying-in Institution, 665
Belladonna in hooping-cough, 137
Bennet, Dr. J. H., on inflammation &c. of the neck of the uterus, 182, 286, 256, 350, 462, 522
Bennett, Mr. T., on peritonitis from a bruise, 324
Bennett, Dr. Hughes, on the microscope, 517
Berncastle's, Mr., case of ileus, 185; note from, 628
Berzelius on the detection of arsenic, 122
Bile, Pettenkofer's test for, 355; secretions and properties of, 414; the colouring matter of, 556
Binns, Dr. E., on the Jamaica College of Physicians, 510
Bird, Dr. G., on urinary deposits, review of, 640
Birkenhead, protest from, 534
Bishop, Mr. S., on functional aphonia, 506
Blackstone on corporations, 664
Bleeding, Mr. Liston on accidents attending, 3
Blood, MM. Andral and Gavaret on, 84; and saliva, ashes of, 92; formation of buffy coat of, 221; self-propelling powers of, 266; chemistry, of red particles of, 613
Bolton, memorial from, 449
Bone, pulsating tumour of, 337; aneurism of, 407; formation of, by periosteum, 471; composition of, 471; injuries of, Mr. Prior on, 579, 608
Books received, 54, 304, 512, 546, 573, 601
Boulter, C. S., note from, 624
Bourne, Mr. T., note from, 600
Boyd, Dr. R., on malformation of the duodenum, 648
Braid, Mr. J., on hypnotism, 628
Brentford Medical Association, 99, 252
Breschet, death of, 634
Bricks and mortar, dignity of, 252
Brigg, medical meeting at, 169
Brighton, meeting at, 423
Bristol, protest of surgeons in, 218
British Medical Association, (*see* Government Medical Bill.)

BRITISH AND AMERICAN MEDICAL JOURNALS:—

Generation between different animals, 12
The sex of the child as a cause of difficulty and danger in human parturition; illustrations of the importance of ventilation; galvanism applied to the treatment of uterine hæmorrhage, &c.; the use of chloride of lime in diseases attended with contagious discharge, 37
Cases of epidemic cholera treated by transfusion, 38
Contributions to the diagnosis and pathology of chest diseases, 66
Œsophagotomy performed in a case of stricture of the œsophagus, 90
A periodical published in a lunatic asylum, 91
The relative frequency of lead colic in different trades; large cauliflower excrescence successfully removed, together with the portion of the cervix uteri from which it grew; the effects of electro-magnetism in restoring suppressed menstruation, 91
Method of ascertaining before accouchement whether the mother will have sufficient milk; the exciting cause of epileptic convulsions; case of great hypertrophy of the heart and open foramen ovale, without cyanosis; worms found in the pulmonary artery of a dog, 121
Contributions to the diagnosis of thoracic diseases, 156
The seat, the symptoms, and diagnosis of intra-pelvic abscess; mesmerism and Miss Martineau, 213
Removal of a coin from the larynx by inversion of the body, 239
The relation of a physician to a colleague, 239
The deleterious influence of the excessive use of tobacco; the self-propelling powers of the blood, 266
Simple method of ascertaining the quantity of solid matter in the urine; a new form of "adjusting invalid bed," 292
Certain functional disorders of the heart apt to be confounded with hypertrophy; the causes of valvular disease of the heart; observations on tumours of the perinæum, 325
The poetry of insanity; the insane in Canada; sewing-needle found in the substance of an ox's heart; treatment of vesico-vaginal fistula, 353
On the use of the thymus gland; description and method of applying Larry's fracture apparatus; the proper method of studying chemistry, 354
The diagnosis of hepatitis and hepatalgia; an American doctor's shop; erectile

tumour treated by inoculation with croton oil; chromic acid as an escharotic; strangulation of the colon by an opening in the meso-colon; the treatment of aneurism by compression, 442
Case of poisoning by stramonium; the difficulty of distinguishing gonorrhœal from leucorrhœal discharge; the formation of bone by the periosteum; the composition of bone; inflammation of the semilunar valves of the pulmonary artery; great malformation of the heart; a single auricle and ventricle, 471
Miscellaneous remarks from the report of the Edinburgh Lock Hospital, 499
On the antiperiodic properties of bebeerine; on the frequent spontaneous cure of pulmonary consumption, and the indications furnished by pathology for its rational treatment, 500
Pyromania; incendiary madness; mode of distinguishing the motor and mixed nerves; effect of the electric current on sensitive nerves; an American quack, 526
Case of poisoning by hydrocyanic acid; remarks on a case of poisoning by hydrocyanic acid, 559
The grape cure in Russia; new proof of the functions of the anterior columns of the spinal cord; a table for discovering the nature of saline deposits in the urine by chemical reagents; a table for determining the nature of saline deposits in the urine by the microscope, 560
On the mechanism and diagnostic value of the friction vibrations observed in peritonitis, 652
Caustics for granular eyelids; microscopic examination of an opaque crystalline lens; the use of iodide of potassium in asthma; habits necessary to the physician, 654
Brixey, Martha, trial of, 597
Bronchitis, utility of ipecacuanha in, 733
Brookes, Mr. W. F., letter from, 599; on swallowing pins and a halfpenny, 641
Brown, Mr. J. B., on ovarian dropsy cured by pressure, &c., 379
Bryan, Mr. E. L., on the lacteal system, 469
Buffy coat of blood, formation of, 221
Bulletin, a medical, 141
Burn, treatment of, 252; opiates in, 384
Burton, Mr. H. R., on pain in ligature of fistula in ano, 428

C

Calculus, Mr. Liston on, 227; case of operation, 507; case of rupturing the urethra, 507
Calculi, urinary, diagnosis of, 28
Campbell, Dr. J. S., on perforation of a cavity through walls of chest, 675
Canada, the insane in, 353
Cancer of glands of stomach, 168
Cancer uteri, vomiting in, 193
Carbon in animals, formation of, by Mr. R. Rigg, 211; Delta on, 292
Cartwright, Mr. R., note from, 601
Cataract, black, 29; images in the eye in, 178; new instruments for, 670
Catheter, new mode of introducing, 232
Cattell, Mr. T., letter from, 598
Cauliflower tumour removed from cervix uteri, 31
Chambers, Dr. R., on crepitus after pleurisy, 289; on particular crepitus of lung, 636
Champneys, Mr. H. M., on the post-mortem appearances of Sarah Hart, 379
Chapman, Mr. W., case of laryngitis, 644
Charing-Cross Hospital, award of prizes at, 545
Chemical and microscopical physiology and pathology, Dr. Day's report of, 171
Chemistry, proper mode of studying, 354
Chemists and druggists, meeting of, 690

CHEMISTRY, PHARMACY, & MATERIA MEDICA:—

A new preparation of cinchona bark, 13
Analysis of milk taken from a he-goat; adulteration of sulphate of quinine, and a method of detecting it; the acids of potatoes · arnica montana; on some substances from the root of smilax China, by H. Reinsch; preparation of the lactate of the protoxide of iron, 38
On a new process for the preparation of liquid hydriodic acid; adulteration of jalap root, 67
The gastric fluid, its nature and properties, 91
Another chemical investigation of the gastric juice; on the detection of prussic acid in cases of poisoning, by M. Witting; ashes of human blood and of the saliva; discovery of two new metals, 92
Description of an improved method of detecting arsenic in cases of poisoning, by M. Berzelius; volatile principles of coal tar, 122
Preparation of pyrophorus from alum, by M. Elsner; adulteration of drugs and medicinal preparations, 156
Chrysen and pyren; on the preparation of pure caustic potash and soda, by M. Bizio, 157
The liquefaction and solidification of gases; Professor Mulder on fermentation and the nature of yeast, 240
Mr. Rigg's paper on the formation of carbon by animals, 292
Extraordinary facts relating to combustion; on some new combinations of iodine (?) 293
Dr. Anthony Todd Thomson on the compounds of iodine, 354
Dr. M. Pettenkofer's test for bile, 355
Poisoning by prussic acid—the case of Tawell, 384
The epileptic patients in Paris; unguentum hydrargyri nitratis; secretion and properties of bile, 414
Anastatic printing, 500
Hippuric acid in the urine in chorea; on the distilled waters of our pharmacopœias, by Robert Warington, Esq., 526
On the composition and properties of the biliary colouring matter, by Professor Scherer, 586
The composition of taurine; tests for creosote; on the purification of honey, by M. Velling; on the preparation of chlorine water; adulteration of saffron, 614
Sulphur in taurine; a method of preparing heavy calcined magnesia; a new method of detecting the adulteration of essential oils, 682
Condensed magnesia; myrrh; metallic salts decomposed by charcoal, 737

Chest diseases, diagnosis and pathology of, 66; perforation of chest in, 75; perforation of cavity through walls of, 675
Chesterfield, the midwifery case in, 49
Chippendale, Mr. J., on tobacco in neuralgia, 238
"Chirurgus" on the fellowship of the college, 49
Chloride of lime in discharges of a contagious nature, 37
Chlorine water, preparation of, 614
Cholera treated by transfusion, 38; the result of inflammation of the spinal cord, 320
Colostrum of the cow, Dr. J. Davy on the, 479
Christison on Poisons, review of, 16
Christopher, Mr. J. C., on a mode of applying ligatures to navi, 676
Chromic acid as an escharotic, 442
Chorea, hippuric acid in urine of, 526; treatment of, 571; treatment of, by strychnia, 636
Chrysen and pyren, 157
Crystalline lens, opaque, examination of, 654
Cinchona bark, new preparation of, 13
Clark, Mr. Le Gros case of opening in urethra cured by operation, 708
Coal tar, volatile principles of, 122
Cocculus Indicus, what becomes of it, 197
Colchester, petition from, 365
Colic, relative frequency in different trades, 91
Colleges of Physicians and Surgeons, Bill respecting, 270
College of Surgeons, (*see* Government Medical Bill.)
Colon, strangulation of the, 442
Combustion, extraordinary facts in, 293
Compression in aneurism, 442
Conjunctivitis, spasmodic, Mr. H. O. Stephens on, 377
Constipation, case of protracted, 339
Contractions of leg, thigh, and foot, Mr. Liston on, 227
Copeman on apoplexy, review of, 532
Copper, pernicious effects of, 374
Coroner, office of, Dr. Beck on, 53
Coroner's inquest, the, 138
Coroners, medical, propriety of, 133
Corpora lutea, true and false, 245
Corporations, Blackstone on the power of dissolving them, 663
Correspondents, 25, 54, 80, 106, 141, 171, 197, 225, 252, 279, 306, 343, 368, 402, 429, 457, 484, 546, 573, 601, 629, 666, 694, 722, 746
Council of Health, the, 429
Councillors of the college, correspondence between Mr. Keate and Mr. Lawrence, 276
Counter-irritation, effects of, 165
Counter practice, a provincial surgeon on, 78
County medical meetings, 664
Cox, Mr. Sands, case of amputation of hip-joint, 193; case of polypus uteri, 480
Craddock, Mr. C., on registration under the new Bill, 343
Craig, Dr. J., on idiopathic gangrene, 319
Creosote, tests for, 614; injections in dysentery, 649
Crepitus in lung, particular, 278; after pleurisy, Dr. J. O. Ward on, 498; of lung, particular, Dr. R. Chambers on, 636
Croton oil in erectile tumours, 442
Cumming, Mr. W., on a peculiar growth of the femur, 641
Curiosities of medical literature, 456
Curling, Mr. T. B., on hypertrophy of the fingers, 648
Cyanogen and its compounds, Liebig on, 1
Cysts near joints, 29

D

Dalton, Mr. W., on turning by the fingers, 413
Daltonian professorship, 25
Damascus, hospital at, 138
Daniell, Professor, obituary of, 400
Davis, Dr. J. H., on midwifery, 728
Davy, Dr. J., on the colostrum of the cow, 479
Day, Dr. G. E., on chemical and microscopical physiology and pathology, 171
Denham's, Mr. W. H., letter to Mr. Guthrie, 596; note from, 719
"Detur Digniori" on the Hunterian oration, 305
Diabetes mellitus, cause of, 437, 465
Dictionary of practical surgery, the, 252
Digestion of sugar and starch, 702
Dislocation, partial, of humerus, dissection of a case of, 323
Dislocations and fractures, Mr. E. Gurney on, 412
Dislocation of the shoulder, Mr. Potter on, 441
Distilled waters, Mr. Warington on, 165
Dog-fish, double fœtal, 224
Dorchester association of general practitioners, 457
Dracunculus, the, 152
Druitt's, Mr. R., case of arteritis, 709
Duke, Mr. W., obituary of, 141
Dunn, Mr. R., on influence of mother on fœtus, 425
Duodenum, malformation of, case of, 648
Dysentery, creosote injections in, 649

E

Eczema mistaken for syphilis, 10
Edinburgh Lock Hospital, report from, 499
EDITORIAL REMARKS:—Remarks on the report of the Committee appointed by the Provincial Medical and Surgical Association, to investigate the proposed plan for establishing "Schools for the Sons of Medical Men," 14; the Government Medical Bill, the state of medical affairs at the opening of the new year, the Finsbury Meeting, prospects of the National Association of General Practitioners in Medicine, Surgery, and Midwifery, 14; the General Hospital, Birmingham, 15; the late examinations for the fellowship of the Royal College of Surgeons in Lincoln's Inn Fields, 16; National Association of General Prac-

titioners, 17; the most important of all medical topics, the Quack's Bill of Sir James Graham, universal union of English General Practitioners, 39; the subject which ought to engage professional attention until the union and organization of the General Practitioners in one Association is completed, 40; the lectures of Liebig, 40; M. Baillargar and Dr. Conolly's courses of lectures on diseases of the brain and insanity, 68; the declaration of the Apothecaries' Company, the National Association of Practitioners in Medicine, Surgery, and Midwifery, and the British Medical Association, 68; the resolutions of the Aylesbury Meeting, 69; the Commissioners in Lunacy, the Visiting Justices of Middlesex and the humane system at the Hanwell Lunatic Asylum, 69; a presumed lunatic condemned to fourteen years' transportation at Edinburgh, 70; the Council of the College of Surgeons and Sir James Graham, 93; pen-and-ink sketch of George James Guthrie, Esq., (the modest author,) by William Lawrence, Esq., his colleague in the Council of the College of Surgeons, 94; meeting of the profession at Cirencester, 95; the lectures of Liebig, 96; the National Association of General Practitioners in Medicine, Surgery, and Midwifery, 123; Dr. Charles Radclyffe Hall's Historical Essay on Mesmerism, 123; quarantine law in France and the rest of Europe, 123; on the necessity of restricting the sale of poisons, 124; another Medical Bill, Sir James Graham's announcement in the House of Commons, 158; important motion of Mr. Ross at the Medical Protection Assembly, 158; memorial of the Medical Protection Assembly to her Majesty, 158; the hygienic state of modern Egypt, the true cause of the plague, the causes of the plague and of malignant typhus in England identical, 150; dismay of the Council of the College of Surgeons, 187; the lectures of M. Baillarger and of Dr. Conolly, necessity of a knowledge of insanity to medical practitioners, the monomania of drunkenness not generally recognised, 187; the Government Medical Bill, 214; the progress of the National Association of General Practitioners, 214; the proposed repeal of the duty on glass, the influence of light on health, 214; the recent medical trial in the Court of Queen's Bench, or, Mr. Lawrence and the General Practitioners, 215; Sir James Graham's Amended Bill, and the prospects of medical reformers, 241; the report of the Paris Academy of Medicine respecting tenotomy in the treatment of lateral curvature of the spine, 241; the new Medical Bills, 267; the public meeting of the National Association of General Practitioners, 267; metropolitan burial grounds, 267; the adoption of the cap and gown at University College, London, 269; the amended Medical Bill compared with the original Bill, analysis of the alterations that have been made in the former, Sir James Graham's speech in Parliament, present position of the ministry with reference to medical reform, prospects of medical reformers, 294; the heads of charter of incorporation, 299; proposed medical conference in London, 300; the British Medical Association and the amended Bill, 300; the Medical Protection Assembly and the amended Bill, 300; the meeting of the National Association of General Practitioners, 300; the associated General Practitioners of Bristol and its neighbourhood, 300; the late meeting of the National Association of General Practitioners at the Hanover-square Rooms, 326; the amended Medical Bill and Sir James Graham, discrepancy between the spirit of the Bill and Sir James Graham's speech, a model Bill should be immediately framed by the profession, and laid before the Government, 326; the late discussion between the medical practitioners of Glasgow and the Odd-fellow surgeons, benefit societies and medical clubs, 327; the "provisional" committee a permanent one, another "hole-and-corner council, 357; the adjourned meeting of the National Association of General Practitioners, 359; the separate incorporation of general practitioners, the Government Medical Bill, 359; the irresponsible permanent committee in Hanover-square, 360; the National Association of General Practitioners, the representative system universally demanded, the provisional committee, the "lawless" committee—its composition only contains one provincial practitioner, 386; the report of the "lawless" committee, the sub-committee of fifteen, 390; the chaotic state of the profession at the most eventful moment in its history, deplorable want of a representative body in London to express honestly and carry out the desires of the profession, most scandalous betrayal of the General Practitioners by the Hanover-square intriguers in their schemes relating to the incorporation of the profession, 415; burial of dead bodies in towns, 418; letter from Mr. Millard to the "lawless" committee of the National Association, 418; postponement of the Medical Bill in the House of Commons, 443; the late parliamentary debate on Mr. Mackinnon's motion respecting interment in towns, 443; the "lawless" permanent Committee discarded by the profession, its double dealing and duplicity unmasked; necessity for a conference or a public committee of members of the Association, 444; the late trials at the Norfolk Lent Assizes, Liebig's lectures, 445; important decision of the committee of the National Association of General Practitioners, announcement of a general meeting of the members of the Association, to be held after the second reading of the Medical Bill, 472; the College of Surgeons, and its real position with Government, necessity for a representative medical body to sit in London, numerous petitions ought to be addressed to the Houses of Parliament, 473; the late trials at Norfolk, Gibbs v. Tunaley, the Queen v. Raymond Gaches, 474; criminal lunatics in Scotland, England expects that every man will do his duty, Mr. Wakley and the committee of the National Association, 476; Mr. George James Guthrie's petition to the House of Commons, for inquiry into the Charter of the College of Surgeons, Mr. Muntz's question with reference to the mode of writing prescriptions, 477; the Medical Bills in Parliament, what is the real opinion of the general practitioners with respect to the College of Surgeons and separate incorporation? the meeting of the members of the National Association, 501; singularity of the proceedings of the committee with reference to the meeting, importance of punctual attendance, 502; the motion for a committee of inquiry into the government of the College of Surgeons, the meeting of the National Association of General Practitioners, the changes made in the Medical Bill by Sir James Graham, the present rights and privileges of the general practitioners, their intended degradation, 528; the present Court of Examiners at the Hall, and any future boards, 530; the Belgrave Lying-in Institution, 530; summary of the debate on the Medical Bill in the House of Commons, 531; treacherous conduct of the committee of the National Association, the surgeons of England imposed upon from the first, the system of self-election once more illustrated, "Gallipot Lodge"—the future home of the surgeons of England! necessity for an early aggregate meeting of general practitioners in London, 561; two or three facts for medical reformers, the Society of Apothecaries and the Court of Examiners, 564; the Apothecaries' Act of 1815, 565; the advantages of the new corporation as proposed by the Minister and the committee of seventy-two, medical appointments in public institutions, 565; the last charter of the College of Surgeons, Dr. Hall's "History of Mesmerism," 566; secession from the Association of General Practitioners, 567; the Amended (!) Medical Bill, analysis of the changes that have been made in the Bill in order to fully accomplish the degradation of the future tenants of "Gallipot Lodge," general practitioners who assume the title of surgeon to be indicted for a misdemeanor, the seventy-two at work, 588; the aggregate meeting, requisition to Mr. Guthrie, 590; Mr. Hawes, M.P., and the medical practitioners of Lambeth, 591; the case of Martha Brixey—an important illustration of a rare form of homicidal insanity, 591; our medical corporations already too numerous, the position of the general practitioners in the first Bill, results of the examiners of the Apothecaries' Company joining the St. Marylebone Association of General Practitioners as reformers, the aggregate meeting of the profession in the metropolis, the servility of the "lawless" committee, prospects of the metropolitan and provincial schools, Mr. Guthrie and the members of the College of Surgeons, 615; the aggregate meeting and medical conference in London, 618; county medical meeting in Shropshire, 619; the Bill, the charter, the last production of the "lawless" committee, 619; the degrading charter spurned by the surgeons of the United Kingdom, the late meetings of surgeons in general practice at the Freemasons' Tavern, the representative principle adopted, the medical conference, the requisition to Mr. Guthrie signed by seven hundred practitioners in a few days, secession from the Association become necessary, 655; the midwifery case at Frome, professional etiquette, or physicians and general practitioners, 657; the aggregate meeting and convocation of surgeons, the requisition to Mr. Guthrie, 658; the apothecary conspirators, the treachery of the managing committee of the National Association unmasked, the revelations contained in its "Transactions," the present position of the surgeons of Great Britain and Ireland, 683; the statement of the Council of the Royal College of Surgeons relative to certain parts of the Medical Bill, 686; the fellows of the new college as medical witnesses in 1846, 687; on the laws regulating the sale of poisonous substances in France, 688; the new scale of medical remuneration in factories, 689; the late meeting of the British graduates in medicine, postponement of the Medical Bill, 689; the statement of the Council of the Royal College of Surgeons, the motives of the Council revealed, servility of the apothecary-committee, their "Transactions," 710; the late duel at Gosport, 715; the analysis of the amended Bill, 738; the aggregate meeting and convocation of surgeons, 742; the "last statement" of the council, 743; the minister and the "lawless" committee, 744

Evans on phthisis, review of, 243

Evans, Mr. S., on obstruction in the intestine removed by operation, 479

Eyre, Sir James, on exhausting diseases, review of, 503

Eye, diseases of, sugar of lead in, 196

Eyelids, granular, caustic in, 654

F

Face, autoplasty of, 28

Factories, medical remuneration in, 689

Femur, fracture of neck of, 83
Femur, peculiar growth connected with, 641
Fenwick, Mr. Thomas, on the lymphatics and lacteals, 29, 63, 84, 118
Fergusson, Dr. B., note from, 345, 568
Fermentation and nature of yeast, 240
Finsbury, meeting in, 20
Fisher, Mr. W., note from, 692
Fistula in ano, treated by ligature, 221; Mr. Salmon on, 248; Mr. Norman on, 248; vesico-vaginal, obliteration of vagina in, 373; pain from, Mr. Boulton on, 428
Foot, partial amputation of, 572
Foramen ovale open without cyanosis, 121
Foreign bodies in the system, 192

FOREIGN DEPARTMENT:—

Spontaneous expulsion of the hyoid bone: the functions of the nervous system; influence of shortness of the umbilical cord on labour, 7
Venous pulse, 8
Italy: scientific congress at Milan, Part II., surgery and midwifery; lithotomy and lithotrity; diagnosis of urinary calculi; autoplasty of the face, 28
Black cataract; cysts in the vicinity of articulation; orthopædic operations; uretrotomy in confirmed strictures of the urethra; on the position of women in labour; Cæsarean operation; on the propriety of determining premature labour in serious disease of the mother, 29
Académie de Médecine, Paris.—The life of Esquirol; fractures of the neck of the femur; urethroplasty, 83; extirpation of a cancerous tumour of the velum palati, 232; M. Hamel on obesity of the umbilical cord, 372; M. Roux on sanguineous or aneurismal tumours of bone; obliterations of the vagina as a remedy for vesico-vaginal fistula, 373
Académie des Sciences.—Researches of MM. Andral and Gavarret on the composition of the blood; chemical phenomena of respiration; on the degenerescence of vaccine matter, 84; on the digestion of feculent (starch) and saccharine matters, and on their influence in nutrition, 231; the engrafting of nerves; M. Maisonneuve's new method of introducing the catheter, 232; the epizootic in Germany, 373; M. Jobert on the re-establishment of nervous action after autoplastic operations; toxical effects of the sulphate of quinine; toxical effects of copper and zinc; effects of compressed air, 374; researches on generation; M. Bonjean on the poisonous effects of the secale cornutum; on the value of vaccination and revaccination; on the anatomy of the sympathetic nerve, 701; digestion of saccharine and amylaceous matters; the functions of the pancreas, 702
French Journals.—The Guinea-worm, (dracunculus,) 152; M. Rochoux on softening of the brain, (ramolissement,) 153; on the curability of softening, 154; Dr. Mayne on the three images of the eye in cataract, amaurosis, &c., 178
Aneurismal tumour of bone, 407
On the chemical composition and other relations of the edible and poisonous fungi, 491
M. Gendrin on aneurismal tumours, 548
M. Gendrin on the preservation of the health of those who work lead, and its preparations, 607
Death of Breschet, 634
New instruments for cataracts, 670
Researches on the carbonaceous deposits which take place during life in the lungs, 727
Forthergillian gold medal, the, 224
Fracture of neck of femur, 83; ununited, of humerus, 572
France, suicides in, 512
French army, veterinary service of, 305
French's, Mr. J., fatal case of adherent placenta, 645
Frome, medical disagreement at, 657
Fungus of testis, operation for, 24; of thigh and leg, Mr. Parson's case of, 34
Fungi, properties of, 491
Funis, length of, effect in labour, 8

G

Galvanism in uterine hæmorrhage, 37
Gangrena senilis, cause of, 720
Gangrene idiopathic, Dr. J. Craig on, 319
Gases, liquefaction and solidification of, 157
Gastric fluid, nature of the, 91
Gendrin, M., on aneurism, 548; on preserving health in lead mines, 607
Generation between different animals, 12; Researches on, 701
Germany, epizootic in, 52, 373
Gervis, Mr. F. T. on cure by absorption, 35
Gibbs v. Tunaley, trial of, 450
Gladstone, Mr., conference with, at Newark, 25
Glasgow University, rights and privileges of, 457
Glottis, spasm of, Mr. R. H. Meade on a case of, 410
Glover, Dr. R. M., on Belaney's case, 585
Goat, male, milk from, 38
Goitre, Dr. Twining on causes of, 678
Gonorrhœa, practical observations on, 263; and leucorrhœa, 471
Goodsir's anatomy, review of, 445
Gout, the acute form of, Dr. Mackin on, 312

GOVERNMENT MEDICAL BILL:—

MEETINGS OF THE MEDICAL PROFESSION—Finsbury, 20; Marylebone, 22; General Medical-Protection Assembly, 42; National Association of general practitioners in medicine, surgery, and midwifery, 42
THE SOCIETY OF APOTHECARIES:—The great medical movement. Incorporation of the general practitioners, 43; a protest addressed by members of the Royal College of Surgeons residing in Surrey, to the Council of that College, 45; report of a Committee of the Provincial Medical Association on the establishment of schools for the sons of medical men, 45; British Medical Association, 72; National Association of general practitioners in medicine, surgery, and midwifery, 72; Medical-Protection Assembly, 96; The Association of general practitioners in medicine, surgery, and midwifery, 97; the legally-qualified general practitioners of Whitehaven, 98; petition against the Bill, from Rutlandshire, 98; prospectus of the Royal College of Unregistered Physicians and Surgeons of London, 98; Brentford Medical Association, 99; Medical-Protection Assembly, 125; meeting of the general practitioners of the City of London, 125; Meeting at Portsmouth and Portsea, 127; the National Association of general practitioners, 127; Medical-Protection Assembly, 162; medical meeting in Lincolnshire, 163; Medical-Protection Assembly, 191; the Association of general practitioners, 191; Suggestions for principal heads of charter, 191; Medical-Protection Assembly, 217; Hampshire, 218; protest of the surgeons of Bristol, 218; meeting at Tiverton, 219; meeting at Sunderland, 219; Medical-Protection Assembly, 275; meeting of general practitioners in the West Riding of Yorkshire, 302; meeting of the National Association of general practitioners in medicine, surgery, and midwifery, 331; meeting of the National Association of general practitioners, 361; University College, 363; Woolwich, 363; the Bedfordshire Medical Association, 363; protest, memorial, and petition, of the members of the Royal College of Surgeons in Manchester, 363; meeting of the general practitioners of Surrey, 364; petition to Sir James Graham from the medical practitioners of Colchester, 365; the protest of certain practitioners of West Somerset, 366; Medical-Protection Assembly, 391; York, 391; meeting of members of the National Association, 391; proposed Charter of the Royal College of Physicians of England, statement regarding the licentiates extra urbem, 393; Royal College of Surgeons of England and the permanent committee of the National Association of general practitioners in medicine, surgery, and midwifery, 420; the College of Surgeons—the Medical Bill, 422; Tonbridge, 422; Brighton, 423; the surgeons of the county of Hereford, 423; Warrington, 424; Medical-Protection Assembly, 447; University College, 448; Liverpool, 448; Essex, 449; the Kidderminster memorial, 449; memorial of the medical practitioners of Bolton, 449; the Leeds memorial, 449; Medical-Protection Assembly, 477; petition of the Leeds medical students, 477; the Royal College of Surgeons in Ireland, 477; the selections for the fellowship, 478; Medical-Protection Assembly, 504; the petitions to Parliament of George James Guthrie and John Charles Hall, 504; memorial of the surgeons of Shropshire, 534; protest of members of the College of Surgeons practising at Birkenhead, 534; meeting of the National Association, 534; Medical-Protection Assembly, 570; the petition of the Birkenhead surgeons, 570; the old Apothecaries' Hall, and the new Gallipot Lodge, 598; the Medical-Protection Assembly, 619; British Medical Association, 620; petition to Parliament, 620; the amended Medical Bill and the projected charter—Manchester, 620; Brecon, 620; Rochester and Strood, 621; British Medical Association, 658; Aggregate public meeting and representative conference, 658; an address to the apothecary-committee from the surgeons of Birkenhead, 659; Plymouth, 659; Proceedings of the surgeons of Liverpool, 660; Petition of physicians of London, 661; Shropshire County medical meeting, 661; the aggregate meeting, 690; Meeting of chemists and druggists, 690; the Plymouth petition, 691; the "Statement" of the Council of the Royal College of Surgeons of England, 691; withdrawals from the Hanover-square Association, 692; postponement of the Medical Bill, and Incorporation in the College of Surgeons, 693; the rejection of the Medical Bill, 693; aggregate meeting and convocation of surgeons, 715; Liverpool, 715; meeting in the county of Chester, 716; meeting at Wolverhampton, 716; City of Worcester, 716; proceedings in North Staffordshire, 744; meetings at Carnarvonshire and Plymouth, 744; petition from Clonmel, 745; the apothecary movement in Liverpool, 746
Gower, Mr. S., on hernia, phymosis, premature labour, and epilepsy, 290
Grape cure in Russia, 560
Grave-yard, the bones of, 601
Gravel in the tubuli uriniferi, 265
Greenhalgh, Mr. R., on indication of premature labour, 424
Greenhow, Mr. T. M., on Miss Martineau's case, 19
Gregory's outlines of chemistry, review of, 161
Gregory, Dr. G., on variola, 163
Gregory's, Dr. W., anecdotes of Liebig, 104
Greatrex, Mr. E., case of popliteal aneurism, 99
Grove, Mr. J., note from, 567
Gurney, Mr. E., on dislocations and fractures, 412
Guthrie's, Mr., petition, 504; his reply to Mr. Denham, 625
Guy's principles of forensic medicine, review of, 188
Guy's Hospital, award of prizes at, 541

H

Halifax, medical petition from, 52
Hall, Mr. J. C., petition of, 504
Hall, Dr. Radclyffe, on mesmerism, (*see* mesmerism.)
"Hall," the, and unlicensed practitioners, 51
Hamel, Mr., on the umbilical cord, 372
Hancock, Mr., cases of cancer penis, 166
Hand, amputation of, Mr. Liston on, 57
Hardy, Mr. R., on ovarian disease, 381
Harrison, Mr. J. B., on fumes of nitre in spasmodic asthma, 383; on general pathology, 730

Hart, Sarah, post-mortem appearances of, 379
Harveian Society, the, 546
Harvey, Dr. A. A., on surgical diseases, 33
Harvey, Mr. G., on public medical charities, 78
Hassall, Mr. A. H., on an apparatus to suppress uterine hæmorrhage, 186; note from, 600
"Hastings," the, circular, 24
Haynes, Dr., and homœopathy, 24
Hawes, Mr., and his constituents, 591
Hæmorrhage, uterine, galvanism in, 37; not arrested by matico, 121; apparatus to suppress, by Mr. A. H. Hassall, 186; secondary ergota and opium, in, 524; health and fecundity, 24
Health of towns, proceedings in parliament respecting, 189
Heart, functional disorders similar to hypertrophy, 325; causes of valvular disease of, 325; malformation of, 471
Heming, Dr. S. O., on abortion, 348, 374
Hensley, Mr. L., on arresting hæmorrhage from leech bites, 400
Hepatitis and hepatalgia, diagnosis between, 442
Hereford, the surgeons of, 423
Hernia, strangulated oblique inguinal, 47; strangulated inguinal, excision of omentum, 47; case of, partially reduced by taxis, 47; strangulated femoral, 48; femoral strangulated, Mr. M. D. Thompson's case of, 66; on dividing adhesions in, 139; Mr. Liston on, 145; purgatives in, 283; Mr. Gower on, 290; strangulated, Mr. Macilwain on, 260, 283, 315
Herbert, Dr. T. H., on perforation of chest in phthisis, 75
Hewett, Mr. P., on extravasation of blood into the arachnoid, 219
Higginbottom, Mr. J., on ipecacuanha as a restorative, 732
Hillier, Mr. H. B. C., on medical politics, 77; correspondence with permanent committee, 454
Hilles, Mr., note from, 139
Hinds, Mr. W., case of protracted uterine hæmorrhage, 210
Hip-joint, amputation of, 193
Hippuric acid in urine of chorea, 526
Hocken on naphtha, review of, 329
Homœopathy and the profession, 24
Hoffman, Dr. W., on indigo, 165
Hogg, Mr. C., on matico in hæmorrhage, 121
Home, Dr. James, death of, 51
Homicidal monomania, 545
Honey, the purification of, 614
Hooping-cough and its effects, belladonna in, 137; a remedy for, 722
Hope, Dr., life of, review of, 42
Horne, Mr. J. H., on medical men, 79; case of quickening, &c., 637
Hospital for Germans, 78

HOSPITAL REPORTS:—

BIRMINGHAM HOSPITAL.—Hydatids of the liver, 427
CHARING-CROSS HOSPITAL.—Cases of cancer of the penis, 166
CHELTENHAM GENERAL HOSPITAL.—Case of diverticulum ilei communicating with the umbilicus, 101; infiltration of urine in the perineum, 101
COLCHESTER HOSPITAL. — Carcinomatous conversion of the glands at the pyloric orifice of the stomach, 168; stricture and ulceration of the œsophagus, with ossification of the trachea and hypertrophy of the heart, 247
CUMBERLAND INFIRMARY, CARLISLE.—Extirpation of ovarian disease, 39
LEEDS GENERAL INFIRMARY. — Case of severe laceration and penetrating wounds of both knee-joints, 535
LONDON HOSPITAL.—Cases of fistula in ano treated by ligature, by Mr. Luke, 221; iritis, 452; division of the spinal nerve—ununited fracture of the humerus, 572; ulcer in the rectum, 572; partial amputation of the foot, 572
LONDON FEVER HOSPITAL, 426
LYING-IN HOSPITAL, BIRMINGHAM, 340
QUEEN'S HOSPITAL, BIRMINGHAM.—Amputation at the hip-joint, 103; case of polypus uteri, occurring under Mr. Sands Cox, cured by ligature, 480
ROYAL FREE HOSPITAL.—Calculus in the bladder—lithotomy, 507; calculus in the bladder—descent into and rupture of the urethra—removal by operation, 507
ROYAL LONDON OPHTHALMIC HOSPITAL.—Ptosis, (palsy of the third pair of nerves; pupil dilated and inactive; upper oblique and outer rectus unaffected,) 22; partial ptosis, 22; ptosis of the left upper eyelid, the iris being unaffected, 22; ptosis, (palsy of the recti, and partial palsy of the inferior oblique, iris of the affected eye being more contracted than that of the unaffected,) 23
ROYAL NAVAL HOSPITAL, HASLAR.—Case of popliteal aneurism treated and cured by pressure, by Dr. Allan, 74
Syrian Medical Association, hospital at Damascus, 138
UNIVERSITY COLLEGE HOSPITAL.— Strangulated oblique inguinal hernia—operation—excision of diseased omentum—cure, 47; strangulated inguinal hernia partially reduced by the taxis—symptoms of obstruction of the intestinal canal—operation, 47; strangulated femoral hernia—operation—cure, 48; tumour on arm—excision, 48; tumour of tongue, 48
Hotel Dieu surgery, 53
Houghton, Mr. E., note from, 483
HOUSE OF COMMONS:—Charter of the College of Surgeons, Poor-law Union Medical Officers, Government Medical Bill, 162; qualifications of Poor-law surgeons, 190; the new Medical Bills, 249; intramural interments, 279; the Medical Bill and the new Charters, 455; Physic-and-Surgery Bill, College of Surgeons, 483; Physic-and-Surgery Bill, 511, 537, 694, 746; the College Charter, 572,
Howard, Mr. Robert, note from, 626
Howell, Mr. T., on a case of fæcal abscess, 648
Hughes, Mr. W., note from, 719
Humerus, ununited fracture of, 572
Hunterian oration, the, by Dr. Lynch, 337; notice of, 418
Hunterian Society, anniversary of, 224
Huntingdonshire, an inquest in, 482
Hydatids of the liver, 427
Hydromellonic acid, Liebig on, 55
Hydrated peroxide of iron in poisoning by arsenic, 413
Hydrocyanic acid, poisoning by, 559; Liebig on, 27
Hyoid bone, expulsion of, 7
Hypertrophy of heart with open foramen ovale, 121; of fingers, case of, 648
Hydriodic acid, mode of preparing liquid, 67

I

Ileum, case of diverticulum of, 101
Ileus from malformation, by Mr. Berncastle, 185
Ilott's, Mr. J. W., case of tetanus, 648
Income tax, unjust operation of, 225
Indian hemp in tetanus, 36
Indigo, Dr. Hoffman on, 165
Inflammation of spinal cord, 88
Influenza among horses, 305
Insane, the, in Canada, 353
Insanity, M. Baillarger on, (*see* Lectures;) the incubation of, 246; the poetry of, 353
Intestine perforation, 504
Intramural interments, 279
Intus-susception, case of, by Dr. Jeaffreson, 651
Invalid bed, new, 292
Inversion of uterus, spontaneous, 383
Iodide of potassium in asthma, 654; in tumours of muscles, 136
Iodine, new combinations of, 293; Dr. A. T. Thomson on, 293
I'on, Mr. J. L., note from, 628
Ipecacuanha, its utility as a restorative, 732
Ireland, incorporation of general practitioners of, 197; College of Surgeons in, 477
Irish College of Surgeons, the fellowship of, 601
Iritis, case of, 452
Iron, protoxide of, lactate of, 38
Islington handbill, the, 49
Italian boys, brief life of, 105

J

Jalap root, adulteration of, 67
Jamaica College of Physicians, the, 510
Jeaffreson, Mr. W., on sugar of lead in eye diseases, 196
Jeaffreson's, Dr. S. J., case of intus-susception, 651
Jeffrey, Dr., on matico, 169
Jerrard, Mr. J. C., note from, 248, 626
Jobert, Mr., on autoplasty, 374
Johnson, Mr. H., note from, 619
Joints, Mr. Liston on diseases of, 3; cysts near to, 29
Jones, Mr. T. E. R., on encysted abscess, 12
Jones, Dr. W., on treatment of burn, 252
Jugular vein, blow on, causing death, 51

K

Keate, Mr. H., note from, 600
Kelso, Dr. J. J., on memory in animals, 79
Kidderminster, memorial from, 449
Kidney, disease of, after scarlet fever, 570
King, Mr. W., cases of slow pulse, 321
Kingdon, Mr. E. C., on rupture of the liver, 324
Knee-joints, wounds of the, 535

L

Labour, effect of length of funis on, 8; women in, position of, 29
Lacteals and lymphatics, Mr. Fenwick on, 29, 63, 84, 118, 469
Lambeth, the meeting at, 141
Larry's fracture-apparatus, mode of applying, 354
Larynx, removal of coin from, 239
Laycock, Dr., on spinal neuralgia and irritation, 103, 304
Lead colic, relative frequency of, in different trades, 91; sugar of, in eye diseases, 196

LECTURES:—

BAILLARGER, M. — ON DISEASES OF THE BRAIN AND INSANITY:—
Lect. 1.—Introduction: On the utility of the study of mental diseases with reference to the practice of medicine, 61
Lect. 2.—Definition; division of causes; hereditary transmission, 109
Lect. 3.— Predisposing causes; hereditary transmission (*continuation*), 253; applications to the general history of hereditary diseases, 256
Lect. 4.—Influence of hereditary transmission—*continued*, 723

HALL, DR. RADCLYFFE—ON THE RISE, PROGRESS, AND MYSTERIES OF MESMERISM IN ALL AGES AND COUNTRIES:—
No. 1.—Assumed antiquity of mesmerism, 112; real origin and progress of mesmerism to the present time, 113
No. 2.—Different modes of operating, and effects stated to have been produced, 149, 179
No. 3.—The facts of modern mesmerism, 206; conditions of mesmeric susceptibility, 206; conditions necessary for producing mesmeric phenomena, 207, 233; various modes of inducing mesmeric phenomena, 234; modes of demesmerising, 235
No. 4.—Effects stated to have been produced by mesmeric operations, 256; effects on the muscular system, 257; effects on the common sensibility and on the sense of smell, 281; effects on the senses of taste and of hearing, 282
No. 5.—Effects on the sense of sight, 309; effects on the intellectual faculties and moral feelings, 345
No. 6.—Effects of mesmerism as a remedial agent, 369; effects of mesmerism on brutes, 370; theories of the animal magnetists, 370
No. 7.—General remarks, 403; remarks on the theories and facts of the mesmerists, 405

No. 8.—Remarks on the facts of modern mesmerism (*continued*), 435
No. 9.—The probable and the possible in mesmerism, 459
No. 10.—Conclusion, 493

LIEBIG, PROFESSOR—COURSE OF, ON ORGANIC CHEMISTRY, DELIVERED AT GIESSEN:
Lect. 19.—Cyanogen and its compounds, *continued;* cobalticyanide of potassium; chromocyanide of potassium; platinocyanide of potassium; iridiocyanide of potassium; palladiocyanide of potassium, 1
Lect. 20.—Cyanogen and its compounds, *continued;* sulphocyanogen; hydrosulphocyanic acid; sulphocyanides; hydropersulphocyanic acid, 27
Lect. 21.—Cyanogen and its compounds, *continued;* products of the decomposition of sulphocyanic acid and of the sulphocyanides, *continued;* mellon; mellonide of potassium; hydromellonic acid, 55
Lect. 22.—Cyanogen and its compounds, *continued;* products resulting from the decomposition of sulphocyanide of ammonium; melam; melamine; ameline; amelide, 81
Lect. 23.—Cyanogen and its compounds, *continued;* observations on the mellon compounds, *concluded;* uric acid, its compounds, and the products resulting from its decomposition, 107
Lect. 24.—Cyanogen and its compounds, *continued;* products resulting from the oxidation of uric acid by metallic peroxides, &c.; allantoin; alloxan, 143

LISTON, MR.—ON THE OPERATIONS OF SURGERY, AND ON DISEASES AND ACCIDENTS REQUIRING OPERATIONS:—
Lect. 16.—Aneurismal varix; accidents in bloodletting; their bad consequences; whitlow; diseases of the articulations; amputation of the upper extremities; amputation of the phalanges of the fingers, 3
Lect. 17.—Amputation of the thumb; the hand; the forearm; the elbow; the upper-arm; the shoulder-joint, 57
Lect. 18.—Amputation of the elbow-joint; paracentesis thoracis; paracentesis abdominis; extirpation of ovarian tumours; hernia; injuries of muscles and tendons, 145
Lect. 19.—Contractions of the leg; of the thigh; of the foot; calculus, 227
Lect. 20.—Lithotrity and Lithotomy, 487
Lect. 21.—Lithotrity and Lithotomy, 513

MURPHY, DR. — ON THE MECHANISM AND MANAGEMENT OF NATURAL AND DIFFICULT LABOURS:—
Lect. 1.—Mechanism of parturition; divisions of labours by various authors; stages of labour by different authors, 575
Lect. 2.—Mechanism of parturition, *concluded*, 603
Lect. 3.—Management of natural labour, 631
Lect. 4.—Management of natural labour, *concluded*, 667
Lect. 5.—Difficult labours, 695

Lee, Dr. Robert, on corpora lutea, 245; on the ovaries during menstruation, 583
Leech-bites, mode of arresting bleeding from, 400
Leeches, the treatment of, 66
Leeds, memorial from, 449
Leigh, Mr. J., note from, 482
Leithead, Mr. T., on poisoning by prussic acid, 640
Letheby, Dr. H., on the detection of arsenic, 289; on poisoning by prussic acid, 497, 638; on the poisonous effects of savin, 677
Lewis, Mr. T., correspondence of, with Mr. Ancell, 453
Lincolnshire, meeting in, 163
Lindley's, Dr., lecture, 510
Liebig, anecdotes of, 104
Ligature in cases of fistula in ano, 221; polypus uteri, 480
Ligatures, mode of applying, to nævi, 676
Lithotomy and lithotrity at Milan, 28; Mr. Liston on, 487, 513
Liver, rupture of, 324; hydatids of the, 427
Liverpool, meeting at, 448
Londinensis on the University of London, 102
London, city of, meeting in, 125
London Hospital, Mr. Luke on regulations of, 50; want of medical instruction at, 252; award of prizes at, 545
London Medical Directory, notice of, 361
Lugol on scrofula, review of, 18
Luke, Mr. J., on regulations of London Hospital, 50; ligature in fistula, 221, 318, 481
Luminous breath, case of, 11
Lunatic newspaper, 91
Lungs, the minute structure of, Mr. Rainey on, 393
Lynch, Dr. J. R., Hunterian oration by, 337; on the committee of the National Association, 662

M

Macilwain, Mr. G., on strangulated hernia, 260, 283, 315; on tumours, review of, 569
Maclure, Mr. W., on diseases of the tongue, 154
Mackin, Dr. C., on gout, 312
McDonnell, Mr. R., on crepitus in the lung, 278
McEgan, Dr., on the surgeons of the Ashbourne union, 508
Maisonneuve, Mr., on introducing the catheter, 232
McVeagh, Mr. J. F., on tic doloureux, 407
Magnesia, calcined, mode of preparing, 682
Mayne, Dr., on cataract, 178
Malformation, case of, 644; of the duodenum, 648
Manchester, protest of surgeons in, 363
Martineau, Miss, case of, 19; repudiation by, of Mr. Greenhow's report, 73; and mesmerism, 213
Marylebone Infirmary, disputes in, 24; appointments in, 52
Marylebone, meeting in, 22
Matico in hæmorrhage uteri, 73; failing to arrest hæmorrhage, 121
Matico-leaf, the proper, 169
Meade, Mr. R. H., on spasm of glottis, 410
Medical charities, public, the, 78
Medical coroner in Montgomeryshire, 305
Medical practitioner, a government, 224
Medical service of army and navy in East India Service, 105, 225, 306, 484
Medical title, a new, 746
Melam, Liebig on, 81
Mellon, Liebig on, 55
Memory in animals, Dr. Kelso on, 89
Menstruation, the ovaries during, 585
Mesmer, a disciple of, 248
Mesmerism at Nottingham, 140; deceptions in, 457
Metals, discovery of two new, 92
Merriman on Cholera, review of, 680
Microscope, histology and use of, Dr. Hughes Bennett on, 517
